# HEAT4ALL ICONIC INFRARED HEATING

Product Catalogue

### Welcome to Heat4All Infrared Heating!

By choosing Heat4All infrared heaters you are choosing a high-quality design product 'Made in Austria'. We make sure to provide our customers with ecological, energy-efficient, innovative and inexpensive heating systems, incorporating state-of-the-art technology and produced using sustainable resources and components.

It is our desire and goal to offer our discerning customers the best possible price-performance-ratio. We therefore regard it as our duty to thus offer you technological top performance and creative designs at affordable prices to make sure you will love heating with our exclusive infrared heaters.

In our efforts to offer you nothing but the very best products on the market, we recently decided to entrust a new, exclusive partner with manufacturing our infrared heaters, the renowned Austrian company Koller. Combining Heat4All's know-how on infrared heaters with Koller's profound technological and electrical knowledge, allows us to provide you with top quality products 'Made in Austria' for heating your personal living and office spaces. Further advantages resulting from this new cooperation, such as a higher production volume, increased storage capacities and therefore shorter delivery times, ensure our international growth.

Thanks to this new and exclusive cooperation, we may now introduce you to our new product generation, **Heat4All ICONIC**.

Heat4All ICONIC is our latest technological achievement in the field of infrared heating. Our new products feature a much higher radiation efficiency in comparison to our previous product generation. This allows us to now heat your rooms with even less energy input and therefore in an even more efficient way than before. Heat4All ICONIC Infrared Panels thus help you to significantly lower your power requirements and heating cost.

Our new product generation Heat4All ICONIC also offers you a completely new, vast range of customization and design options, allowing you to turn your personal living and office space dreams into reality. No matter if you are interested in one of our Picture, Mirror or Decor Glass Panels – never before have we been able to offer you a wider selection of print motifs, glass colours and further customization options to design your personal living and office space heating.

Thank you very much for your interest in our products and I wish you truly amazing heating experiences using our Heat4All ICONIC panels.

Yours sincerely,

*Norbert Cuder*

*Nice to heat you...*

Heat4All ICONIC Glass Picture Panel

Anyone trying to live healthily and sustainably does well to remember nature and its unique powers. We at Heat4All follow nature's example and combine experience and science in our new high-quality ICONIC Infrared Heaters.

In nature, infrared radiation is very common: The rays of the sun or a cosy fire are both natural sources of infrared radiation. Approximately 50 % of the sun's rays reaching the ground are infrared rays. It is thanks to those rays that sunbathing makes us feel comfortably warm and relaxed. Infrared radiation, however, has nothing to do with the harmful UV rays of the sun. Those belong to the other 50 % of the sun's radiation, the part that is visible to us and which we perceive as light. Open fire mostly emits infrared radiation as well, thereby generating heat.

Infrared radiation and its warming properties have been known since approximately 1800 and were discovered by the German-British astronomer, engineer and musician Friedrich Wilhelm Herschel. Back then he was trying to measure the temperatures of the different colours of the sunlight's spectrum and found that most of the sun's radiation lies within the infrared spectrum. This valuable insight has been used by people engaged in scientific research and industrial purposes for over a decade now: The Russian space station MIR was, for example, heated by infrared heaters for an uninterrupted period of 18 years and big cruise ships such as the famous 'Traumschiff' have been using infrared heaters for several years as well.

The special advantages of infrared heaters as your preferred heating system are thus as diverse as their fields of application and their possibilities for customization.

Heat4All ICONIC Picture Panel

All conventional heating systems, such as wood, gas, pellets, oil or heat pumps, work according to the principle of convection heat. Applying convection heat means heating the air in a room, which then, in turn, warms the people and objects in the room. This principle leads to an uneven and usually uncomfortable distribution of heat within the room as well as high heat losses due to air constantly flowing in and out of the room.

As warm air rises up, convection heat further causes low temperatures near the floor and high temperatures near the ceiling. This means that, before people in the room can even begin to feel warm, the entire air volume within the room has to be heated. Whenever one opens a window while heating, part of this warm air escapes the room and has to be heated yet again. Additionally, the high differences in temperature between the floor and the ceiling areas cause air and dust swirls, which may be especially problematic for allergic or sensitive people. Heating the air further results in uncomfortably low humidity.

Infrared heaters, on the other hand, do not warm the air but instead use direct heat, warming the walls as well as all bodies and objects within a room. The heat stored within these walls and the furniture is then re-emitted evenly. All this constitutes a completely natural process, just like when heating with a tile stove or when basking in the sun. When using an infrared heater, people in the room will start to feel warm mere minutes after turning the panels on while the air will not be overheated and thus dried out. Neither will there be any air or dust swirls as the heat is distributed evenly within the room. Opening a window, fresh air can be let in without any adverse effects as the heating effect is independent of the air temperature and flow. Thanks to the heat emitted by the infrared heater itself as well as the heated objects within the room, the perceived room temperature is about 2-3° C warmer than when using convection heating. This means that, in comparison, shorter heating periods and lower target temperatures are required to achieve the same heating effect. The gentle infrared heat thus allows for more comfort and reduced heating costs thanks to its faster heating effect as well as fewer required hours of operation.

Our Heat4All ICONIC panels perfectly combine all these advantages in comparison to conventional heating systems by exclusively incorporating top-notch materials and making sure our products comply with only the highest standards of quality.

Heat4All ICONIC Classic

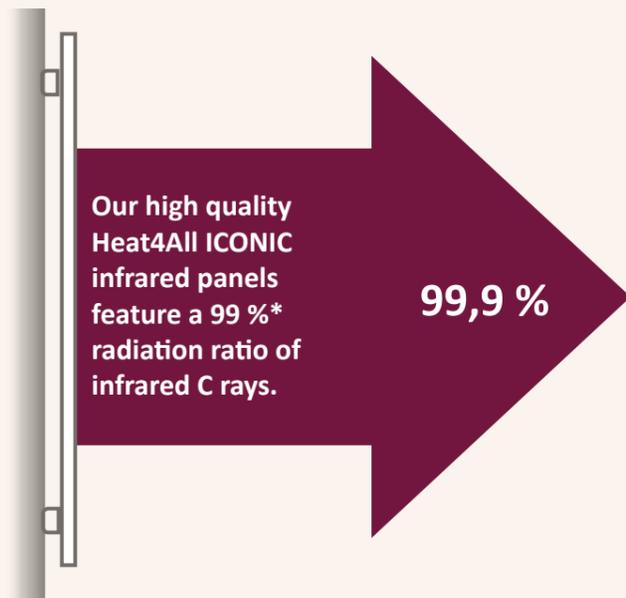

Heat4All ICONIC Classic

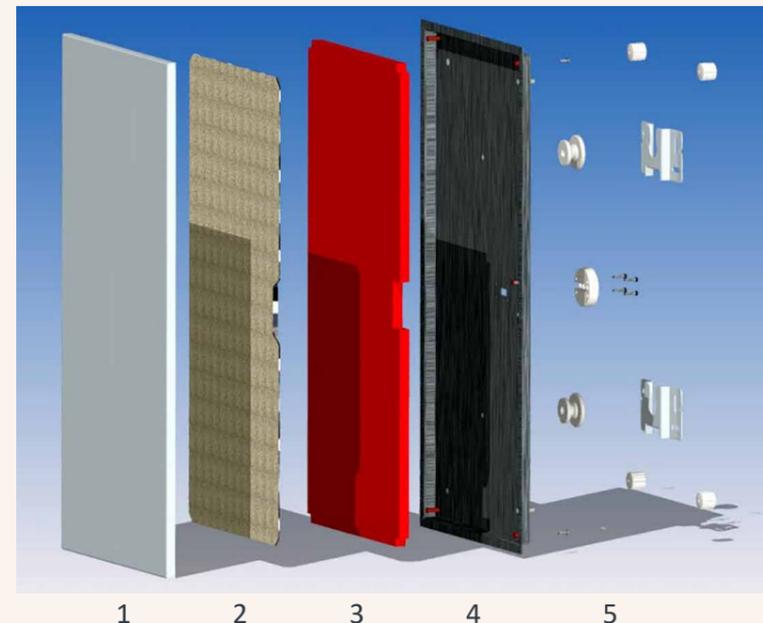

## Technology Made in Austria

Developed and produced in cooperation with our partner Koller, our new product generation, Heat4All ICONIC, features a much higher radiation efficiency than its competitors. This amazing result stems from a new and exclusive insulation layer, developed specifically for our new infrared panels, as well a special powder-coating that allows for an even higher emissivity of now 0.96\*. This higher efficiency further results in lower energy requirements and thus allows for fewer daily operation hours so that your heating costs will be significantly lowered.

Apart from their exceptionally high emissivity our new Heat4All ICONIC Infrared Heaters also reach a radiation ratio of infrared C rays of 99.9 %. Besides the radiation ratio, what is most crucial for determining the overall efficiency of an infrared heater is its radiation efficiency. Highly efficient infrared heaters should reach at least 50 % radiation efficiency to the front and 70 % in total. The radiation efficiency of our new Heat4All ICONIC infrared panels is 55.1 % to the front as well as 71.1 % in total\*, placing Heat4All ICONIC infrared panels among the most efficient infrared heaters currently on the market. Moreover, after only four minutes of operation, our Heat4All ICONIC panels reach surface temperatures of up to 70° C so that infrared rays will be emitted almost immediately. All this has been confirmed in a study conducted by the Technical University Stuttgart. Please find further details on this study on our website at [www.heat4all.com](http://www.heat4all.com).

\*Source: Study on radiation efficiency, conducted by the Technichal University Stuttgart (06/2016)

## Structure of the new Heat4All ICONIC Infrared Panel

1. Coated steel front with high IR radiation ratio and high UV persistence
2. High-quality heating element with Constantan heating conductor
3. Thermal insulation with IR reflector
4. Coated, massive steel rear panel
5. Sturdy and flexibly adjustable mounting system

Heat4All ICONIC Picture Panel

## Design unlimited

Thanks to a broad selection of new design and customization options, our new product generation, Heat4All ICONIC, allows you to take the personalization of your living and office spaces to entirely new levels. We offer you a never before seen variety of printable motifs for your Picture and Glass Picture Panels and our new, unlimited selection of colours for your Heat4All ICONIC Decor Glass Panels will be sure to excite you. Just like our bathroom options, such as our Mirror Panels, available in different sizes, or our Heat4All ICONIC Towel Dryers, which you may design according to your personal taste.

## The Advantages of Heat4All ICONIC Infrared Heating

... for your budget

- low investment costs
- low heating costs
- no maintenance costs
- no hidden additional costs

... for your personal well-being

- a most comfortable room climate
- almost no air or dust swirls

... for the planning of your living and office spaces

- easy mounting
- extensible system
- ideal for any kind of room

On the following pages we would like to introduce our new Heat4All ICONIC models and hope to inspire you by giving you a glimpse at our newest technology 'Made in Austria' as well as all the fantastic new customization options that are now available to you.

# HEAT4ALL ICONIC CLASSIC (FRAMELESS)

Heat4All ICONIC Classic, ceiling-mounted

Heat4All ICONIC Classic

## PRODUCT SPECIFICATIONS

Surface: sheet steel, powder-coated  
 Rear panel: sheet steel, powder-coated  
 Field of application: direct heating  
 Surface temperature: approx. 90° C to 110° C  
 Voltage: 230 Volt, 50/60 Hz  
 Colour: white  
 Safety specs: IP 45, protection class 1  
 Temperature protection: 1-2 sensors, depending on heater dimensions  
 Power supply: Type CEE 7/7 tilted, 8 mm flat; cable length: 1.9 m

Certificates:

## INSTALLATION

wall or ceiling mounting

# HEAT4ALL ICONIC HEAT & LIGHT LIGHT FRAME

Heat4All ICONIC Heat & Light Light Frame

Heat4All ICONIC Heat & Light Light Frame

The Heat4All ICONIC Heat & Light Light Frame combines the benefits of our Heat4All ICONIC Infrared Heaters with modern LED technology. By using special corner pieces, all mechanical as well as electronic elements can be easily connected by simply plugging them together. This allows for the frame to be quickly assembled without the requirement to solder anything. Heat4All ICONIC Heat & Light Light Frames provide comfortable heat as well as soft light right where it is needed. The Light Frames will be mounted by a professional electrician.

## SPECIFICATIONS LIGHT FRAME

Heat4All ICONIC Glass Picture Panel as Towel Dryer

Our Heat4All ICONIC Towel Dryer heats your bathroom while warming and drying your towels. We are happy to let you know that for the first time ever we may offer you the option to turn any Heat4All ICONIC infrared panel into your personally customized towel dryer. New, beautifully shaped rails perfectly accentuate your Heat4All ICONIC Towel Dryer.

**PRODUCT SPECIFICATIONS**

Please see Heat4All ICONIC Panel of your choice. Usable with panels in portrait orientation only.

**HEAT4ALL ICONIC TOWEL DRYER RAILS**

**HEAT4ALL ICONIC VERTICAL STANDS**

Would you rather your Heat4All ICONIC Panel did not have to be mounted on your wall or ceiling but could be free-standing? No problem at all, thanks to our high-quality vertical stands.

Robert Delaunay

Are you dreaming of having your very own painting by one of the greatest artists in history, such as Claude Monet or Gustav Klimt? Thanks to our cooperation with Artothek, a comprehensive picture archive featuring high-quality digital records of paintings and set up in cooperation with numerous national and international museums, we may offer you a vast selection of works by world-renowned painters for print on your Heat4All ICONIC Infrared Panels.

In the following we would like to show you a small selection of motifs available in our Heat4All Art Collection. Further motifs can be found at [www.artothek.de](http://www.artothek.de).

## HEAT4ALL PERSONAL PRINTING

The memory of a beautiful moment or your loved ones, eternalized on a photograph, the romantic sunset you captured during your last holiday – Heat4All also offers you the possibility to print our Heat4All ICONIC Infrared Panels with all your favourite personal motifs.

Company logos, quotes or infographics are further great options to personalize your Heat4All ICONIC Panels. The ideal print resolution for personal motifs is 300dpi in panel size. We are glad to help you prepare your pictures. Please make sure to only transmit motifs for which you own the required printing rights.

## HEAT4ALL MOUNTING SYSTEM

Included in all our deliveries, our Heat4All mounting system with spacers for mounting the panels on the wall ...

... allows for the simple and quick installation of your Heat4All ICONIC Infrared Panels.

## HomeMatic Central Hub

The HomeMatic Central Hub is the centerpiece of the automated control of your Heat4All Infrared Heaters. This innovative device serves as the hub that connects all other components of your user-friendly control system. It can be easily and intuitively programmed via your PC.

## HomeMatic Wall-Mounted Thermostat (wireless)

In order to ensure ideal temperatures in each room, we recommend using our HomeMatic Wall Thermostat. The HomeMatic Wall-Mounted Thermostat allows you to individually set the temperature for each room, be it your cosily warm living room or your comfortably cool bed room. Simply install one HomeMatic Wall Thermostat per room and set it to your preferred temperature.

## HomeMatic Adapter Plug Switch Actuator

The HomeMatic Adapter Plug Switch Actuator serves as an adapter between the plug and your Heat4All Infrared Panel. It is super simple to install and immediately connects your infrared heaters to your user-friendly HomeMatic control system.

## HomeMatic Flush-Mounted Switch Actuator

The HomeMatic Flush-Mounted Switch Actuator allows you to wirelessly connect your Heat4All Infrared Panels to your HomeMatic control system. To use it, simply install the Flush-Mounted Switch Actuator within the wall right behind your Heat4All Infrared Panel.

## HomeMatic Remote Control via Smartphone, Tablet & PC

For even more comfort, you may program and control all the components of your HomeMatic control system via the HomeMatic remote control app for smartphone, tablet and PC. Turn your heaters on and off, change the temperature settings and monitor your room temperature anywhere and any time with this handy application.

**PLEASE NOTE:** Using HomeMatic Remote Control is free the first year. The fee you'll be charged after that is determined by HomeMatic and cannot be influenced by Heat4All.

## Heat4All Room Thermostat (wireless)

The H4A Wireless Thermostat allows you to automatically control the temperature settings of your Heat4All Infrared Heaters in your living and office spaces. The H4A Wireless Thermostat is a digital wireless thermostat with green LCD backlight. Its biggest advantage is its simple and flexible installation, no network connection or cable required. The wireless thermostat can be connected to up to 9 receivers/switching elements.

Advantages of the H4A Wireless Thermostat:

- 7 weekly programmes, 6 temperature settings per day
- Simple and flexible installation – no network connection or cable required
- Quick change of temperature settings
- Information on operating hours / childproofing option / button lock
- Different programming for different days possible (Mon-Fri, Sat-Sun and Mon-Sun)
- Frost protection (3° C), low-battery alarm
- Range up to 35 m

## Heat4All Room Thermostat with Rotary Switch (wireless)

The Heat4All Room Thermostat with Rotary Switch allows you to intuitively set your room temperatures by simply turning the rotary switch.

## Heat4All Flush-Mounted Switch Actuator

The Heat4All Flush-Mounted Switch Actuator turns your Heat4All Infrared Panel on or off, based on the data transmitted by the wireless thermostat. Its biggest advantage is its simple installation into a flush-mounted socket.

## Heat4All Adapter Plug Switch Actuator

The Heat4All Adapter Plug Switch Actuator turns your Heat4All Infrared Panel on or off, based on the data transmitted by the wireless thermostat. It is directly plugged into the socket.

## Heat4All Plug-in Thermostat TS 10

The Heat4All Plug-in Thermostat TS 10 brings the convenient control of your Heat4All Infrared Panels to the next level. Apart from setting the temperature of your panels, you may also set up different automated programmes. The Heat4All Plug-in Thermostat offers an excellent price-performance-ratio.

## OUR PRODUCTION

Factory Vitis / Lower Austria

Our Heat4All ICONIC Infrared Panels are all development and manufactured in cooperation with our Austrian partner Koller. Our highly qualified team works hard to make sure our newest product generation is nothing short of the very best product on the market.

Koller has already won multiple outstanding awards and, in 1998, was also presented with the Austrian coat of arms. Koller was further granted the right to use the 'Austria Gütezeichen', a national mark of quality.

## HEAT4ALL INTERNATIONAL

Already present in no less than 23 countries and still growing, we at Heat4All and our international network of partners offer competent and individual consultation, solution-oriented sales practices and qualified support to our customers. Are you looking for more information? Visit us at [www.heat4all.com](http://www.heat4all.com) and let us help you find one of our amazing sales partners close to you.

## WARRANTY AND CERTIFICATES

The warranty we grant our customers as well as the multiple certificates we have been granted are proof of the great quality and high efficiency our products provide. They also guarantee that our products are perfectly safe, for our customers as well as the environment. Upon choosing Heat4All ICONIC Infrared Panels you are putting your trust in a unique and first-class product, specialized in top-notch technology and design.

We grant 96 months of warranty on the performance of all our ICONIC infrared panels (SmartLine 60 months) as well as 36 months of warranty on all frames and the print. Moreover, all electronic components, such as thermostats and actuators, as well as our Heat4All ICONIC Heat & Light Light Frames come with a warranty of 24 months.
